Programme overview
The general Master’s programme in Biology gives you an opportunity to design a personal study plan. You choose from around 50 courses at advanced level in biology. Are you interested in biodiversity and taxonomy? Choose the Nordic Master’s programme in Biodiversity and Systematics as a specialisation within General Biology. We have excellent facilities for laboratory work and conducting field experiments. Most courses are full-time studies and you usually take only one course at a time. The courses are typically teaching-intensive, with lectures, seminars, excursions as well as theoretical and practical exercises. You are expected to spend about 40 hours per week on studies, self-studies included. Normally, you take two courses of 15 credits per semester, i.e. a total of 60 credits per year. Please note that some courses have other prerequisites than those of the programme, and require previous studies in biochemistry and molecular biology.

Special features of the programme:
• Broad range of courses covering subjects from cell and molecular biology to organismic biology and ecology
• Close connections to research in an international environment
• Extensive experience in offering courses in English and well-developed student exchange programmes
• Integration of theoretical analyses with strong training of laboratory skills and field work

Programme modules/courses
COMPULSORY COURSES: Population and Community Ecology or Neurobiology (15 credits) and optional advanced level courses in biology (45 credits), Master’s degree project in biology. See list of courses at https://www.biology.lu.se/education/undergraduate-graduate-studies/courses/advanced-courses.

Career prospects
The knowledge and skills you will gain on this programme open doors to employment within many sectors of academia and society. Employment can be found within agencies concerned with environmental protection issues, education or research funding. The programme also provides a solid grounding that prepares you for further postgraduate studies.

Entry requirements and how to apply
ENTRY REQUIREMENTS
A Bachelor’s degree of at least 180 credits, of which 90 credits must be in science, including 15 credits in chemistry, 5 credits in statistics and 60 credits in biology comprising cell biology, genetics, microbiology, ecology, botany and zoology, or the equivalent. English Level 6 (equivalent to IELTS 6.5, TOEFL 90). See www.lunduniversity.lu.se for details on English proficiency levels.

HOW TO APPLY
1. Apply online: Go to www.lunduniversity.lu.se/biology. Click on “Apply” and follow the instructions for the online application at the Swedish national application website www.universityadmissions.se. Rank the chosen programmes in order of preference.

“I liked the fact that the programme is general, allowing me to do what I want. I can choose my own courses and Lund University provides a huge diversity of courses that I’m interested in. I looked up all the courses beforehand, and I found a lot that interested me, so I thought it might be the right place for me! I feel quite free in this programme. It was the perfect programme for me in that sense.”
Blandine Lyonnard from France
2. Submit your supporting documents:

• **General Supporting documents:** Check what documents you need to submit (i.e. official transcripts, degree diploma/proof of expected graduation, translations, proof of English, passport) and how you need to submit them at www.universityadmissions.se.

• **Programme-specific supporting documents:** When applying for this programme, you must also submit a “Summary Sheet”. See the programme webpage for details.

• **3. Pay the application fee** (when applicable).

**SELECTION CRITERIA/ADDITIONAL INFO**

The selection will be based on grades awarded for previous academic courses, as well as the statement of purpose and qualifications from research/work of relevance (from the applicant’s ‘Summary Sheet’).

**TUITION FEES**

There are no tuition fees for EU/EEA citizens. For non-EU/EEA citizens, the tuition fee for this programme is SEK 145 000 per year. See www.lunduniversity.lu.se for details on tuition fees.

**About the Department of Biology**

We have outstanding competence in education and research, covering a large number of biological disciplines from molecular biology to large-scale ecology. Several of our research groups are world-leading in their topic and a large number of international projects is coordinated by the department of Biology. As our education is integrated with the department’s research, you will have researchers as teachers and get involved in ongoing projects during your studies. Our courses range from basic to Master’s level. We offer around 50 advanced level courses as well as an extensive postgraduate programme.

**About Lund University**

Lund University was founded in 1666 and is repeatedly ranked among the world’s top 100 universities. The University has 40 000 students and 7 600 staff based in Lund, Helsingborg and Malmö. We are united in our efforts to understand, explain and improve our world and the human condition.

Lund is the most popular study location in Sweden. Lund University offers one of the broadest ranges of programmes and courses in Scandinavia, based on cross-disciplinary and cutting-edge research. The University has a distinct international profile, with partner universities in around 70 countries.

Lund University has an annual turnover of SEK 8.5 billion, more than half of which is destined for research. Our eight faculties conduct strong research in many different areas, including over thirty research fields in which we are world-leading. Many scientific breakthroughs and pioneering innovations have originated from Lund University.

The world-leading research facilities MAX IV and ESS which are being established in Lund will be of great significance for research and industrial development within materials and life sciences. MAX IV is the world’s foremost synchrotron radiation facility and the ESS will be the most powerful neutron source in the world once it opens for research in 2023. Science Village Scandinavia is developing nearby and is destined to become a meeting place and a test environment for research, education and entrepreneurship.
